Jeté unites
slim-line beauty
with lasting
comfort, bringing
sophistication to
every executive &
conference space.

Shaped for fluidity, crafted with elegance, designed Jeté.

The Jeté seating collection stands apart, proving that slim-line design does not have to sacrifice comfort. Triple award-winning, Jeté embodies Via Seating's commitment to engineering seating where beauty & performance coexist in perfect balance.

At the heart of Jeté is its pioneering Flex Band Technology. Across its automotive-inspired steel framework, durable flex bands are stretched and then injection-molded with Via Seating's proprietary comfort foam. This innovative construction delivers the sleek, architectural silhouette designers crave, while offering the responsive comfort & flexibility usually found only in bulkier chairs.

Jeté also features a true knee tilt mechanism, engineered for superior ergonomic support. Unlike traditional tilt systems, the forward-positioned rotation axis allows the sitter's feet to remain flat on the floor while leaning back. The result: hips & spine open naturally, circulation improves, pressure points reduce & posture alignment is optimized—all while maintaining all-day comfort.

Every detail of Jeté reflects precision & sophistication. Distinct tailoring enhances its slender form, while a selection of bases, fixed or adjustable arms & control options provide versatility across boardrooms, private offices & collaborative spaces.

Jeté is a statement of innovation & refinement. It merges advanced engineering with a graceful design language—delivering style, support & confidence to every space it occupies.

Smart Features

Triple Stitch Patterns

Jete offers 3 distinctive stitch designs—shadow-tufting, box stitch & fine-line stitch—that bring tailored sophistication to its form. Each pattern highlights the artistry of precision upholstery, creating visual rhythm & subtle texture that elevates the chair's contemporary profile.

Arm Elegance

Available in polished aluminum or sleek black, Jete's fixed arm option adds a bold architectural accent. Its clean lines frame the chair with a refined edge, offering both durability & a striking design detail.

True Knee-Tilt

Jete's knee tilt control delivers smooth, natural recline by pivoting at the knee rather than the hip. This ergonomic motion promotes circulation, reduces pressure & enhances comfort—ideal for extended meetings & focused work sessions.

High-Profile Bases

Jete's high-profile base is paired with open-design casters that strike a balance between strength & style. The elevated form enhances stability while the modern, airy caster design adds a refined architectural detail to the chair's foundation.

Jeté Collection

Triple award-winning seating with triple back & stitch patterns to apply across conference, management & executive applications.

Sustainability

DfE Lead Design →

All Via Seating products follow the Design for the Environment (DfE) design approach. During this process, all components are screened to identify and assess the human and ecosystem health impacts of chemicals of concern. We screen all product components to the ANSI/BIFMA e3-2019 Annex B- List of Chemicals of Concern and the California Proposition 65 List.

Vigorous Testing →

Our products are annually assessed by a 3rd party team of chemists & globally-recognized ISO 17025 accredited lab. They are rigorously tested for conformance to ANSI/BIFMA e3 standard credits 7.6.1, 7.6.2 and/or credit 7.6.3 as well as conformance to low-emitting materials. Prior to product launch, every product is continuously developed testing its functionality & durability within Via Seating's ISO 17025:2017 accredited lab.

Environmental Impact →

All Via Seating products are BIFMA LEVEL® certified. LEVEL® is an evaluation and certification system for environmentally-preferable and socially-responsible office furniture. 3rd party certification is achieved by conformance to a multi-attribute standard created by the Business and Institutional Furniture Manufacturer's Association (BIFMA) that evaluates product impacts across categories including Materials, Energy, Human

End of Life ↻

Via Seating provides accessible care guidelines that help maintain the quality of every product and easy-to-follow disassembly instructions when a product reaches the end of its life.
