Details

The Onda mesh by Via Seating is a high-performance, 4-way stretch elastomeric mesh—composed of 52% nylon and 48% polyelastomer—available in a sophisticated, exclusive palette designed specifically for the award-winning all-mesh Onda chair. It delivers breathability, ergonomic flexibility & easy maintenance—fully vacuumable, cleanable with mild soap, and safe for occasional bleach disinfection—while containing no antimicrobial or flame-retardant additives.

Makeup

52% Nylon, 48% Polyelastomer

Cleaning & Care

WS + BC: To prevent overall soil, frequently vacuum and lightly brush the best to remove dust and grime buildup. Mix mild soap and warm water together and using a lint-free cloth, damp it a little bit into the mixture. Dab gently where the stain is located. Use a different, dry, lint-free cloth to dry the area. Repeat if needed. Infrequent use of no greater than a 2:10 bleach to water solution can be used for disinfection of the mesh. The accumulate wet contact time should be limited to a maximum of two hours over the life of the chair. Regular bleach cleaning of this mesh is not recommended.

Qualities

Bleach cleanable
No antimicrobial additives
No flame retardant additives
